Cool Tools for Hot Topics

USGS Science Applications for Fish and Wildlife Management

Tuesday, September 11, 3 - 5 PM

Room II Terrazzo

Join USGS scientists and colleagues in an interactive session to learn about USGS science-based tools and approaches to address a variety of fish and wildlife management hot topics, including how and when to apply them to specific management issues.

Select from seven interactive breakout sessions aimed at providing insight into tools and applications for decision-making, discuss their strengths and limitations, and share examples of ways they have been used by management agencies.

- New Tools to Predict and Detect the Spread of Invasive Species
- Disease and Biosurveillance Tools for Chronic Wasting Disease Management
- Integrated Population Models for T&E Species Management and Recovery
- Wind Energy Turbine Mapper and Bat Distribution and Impact Tools
- Advances and Training Opportunities for Species Distribution Modeling
- Applications to Support Landscape Restoration
- Tools to Support State and Multi-Jurisdictional Monitoring Activities
