

Smart Energy Development

Science and Tools to Inform Planning, Development, and Reclamation

Monday September 10, 1-3 PM

Florida Salon VI

Join USGS scientists and colleagues to learn about an approach for informing decisions that balance energy development and other conflicting natural resource management demands, considering the need for efficient decision making and a broader landscape-scale perspective.

- Welcome - Anne Kinsinger, USGS Associate Director for Ecosystems
- Introduction to the USGS Smart Energy Development Concept - Steve Hanser
- Energy Resources and Development Potential - Karen Jenni
- Assessing Reclamation and Recovery Potential - Mike Duniway
- Restoring Wildlife Habitat in Western Landscapes - Jayne Belnap
- Smart Energy Development Tool Components - Zack Bowen
- Discussion
